Re: Jovana Stojkovic

To Whom It May Concern,

I am writing this letter in support of Jovana Stojkovic, MD. I am a Board-Certified Family Practitioner with over 25 years of experience.

The freedom for medical choice is a basic human right. Informed consent is a must with any medical procedure. The Nuremberg trials identified what can go wrong when medical therapies are done without consent. The Nuremberg Code was developed as a result of Nazi experimentation on humans during WWII. As you know, the Nuremberg code states, "Required is the voluntary, well-informed, understanding consent of the human subject in a full legal capacity. The human subjects must be free to immediately quit the experiment at any point when they feel physically or mentally unable to go on."

A competent patient should have the choice about whether to undergo any medical procedure including vaccination. As a physician and a parent, I feel that I am most capable for deciding which medical therapies are going to be given to my children.

Mandating vaccines that have adverse effects violates basic human rights. Dr. Stojkovic is rightfully lobbying for patient choice. Dr. Stojkovic should be commended, not disciplined.

Sincerely,

A handwritten signature in black ink, appearing to read 'David Brownstein', with a long horizontal flourish extending to the right.

David Brownstein, MD.
